

## Technical Needs Briefing for the show **SIE7E** by the company **ymediateatro**

- **VENUE:** The theatre **SIE7E** must be placed in an **open location (it could also be a large indoor space)**, **flat, with no slopes, bumps or holes, and clean**, like plazas, promenades, parks, large halls, arcades, etc. With **access for a 9 meters long articulated vehicle (a van with a trailer)**. The van must be there during the set-up but can be taken out to another parking place once everything is ready.
- **MEASURES:** Once installed, it occupies an area of **7 m. long by 4 m. wide and 4 m. high**, although for the street amusement of the show and for the best enjoy and comfort during the waits and accesses to the theatre, it would be optimal to have some **practicable space in the surroundings of the whole installation**.  
  
Sometimes it is advisable to provide some **fences** to mark off that perimeter.
- **POWER:** The organization will provide **an standard schuko socket** within **10 meters** from the final location of the micro theatre, with a minimum power capacity of **3.000 VA at 220 Volts (~15 Amperes)**.
- **TIMING:** The **set up time** for the micro theatre is **3 hours**.  
Usually, if the company already arrived to the venue and it is possible, it is preferable to set it up on the day previous to the performances.  
**Dismantling** takes just **1,5 hours**.
- **SUMMER:** Although the theatre **SIE7E** has its own air conditioning system, when placed outdoors it would be optimal to program the **start of the performances from the sunset on**, or locate it in a **shadowy place**. This is specially indicated for hot summer sun programs and/or warm Southern venues.
- **RAIN:** It is important to note that **the set up cannot be done when raining** because some parts could get spoiled if they get wet during this process. Anyway, **once the micro theatre is built up there is no problem** for the performances with soft rain. Hard rain is always uncomfortable for everyone.
- **WHAT ELSE?:** Nothing else, the company provides the rest of the equipment needed for the show, lights and sound.

In any case, you can contact us in the next phones and addresses:
